-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2142

1. Claims 17-46 are present for consideration.
2. Since a patent may only be granted on an invention (each in the singular), restriction to one of the following inventions is required under 35 U.S.C. 121 (see 37 CFR 1.141):

Group I. Claims 17-25, drawn to an entertainment system Classified in Class 463, subclass 42 .

Group II. Claims 26-30, drawn to a data server Classified in Class 709, subclass 203 .

Group III. Claims 31-46, drawn a method and machine readable recording medium for distribution content data Classified in Class 381, subclass 77.

3. Inventions I and II are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group I has separate utility such as in an entertainment system not used in a data server as claimed in Group II.
4. Inventions I and III are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group I has separate utility such as in an entertainment system not used in a method and machine readable recording medium for distribution content data as claimed in Group III.
5. Inventions II and I are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group II has separate utility such as in a data server not used in an entertainment system as claimed in Group I.
6. Inventions II and III are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group II has separate utility such as in a data server not used in a method and machine readable recording medium for distribution content data as claimed in Group III.
7. Inventions III and I are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group III has separate utility such as in a method and machine readable recording medium for distribution content data not used in an entertainment system as claimed in Group I.

Art Unit: 2142

8. Inventions III and II are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention of Group III has separate utility such as in a method and machine readable recording medium for distribution content data not used in a data server as claimed in Group II.

9. An undue burden would be placed upon examiner since the search each Group would be in classes and subclasses not required for the other Groups.

10. Because these inventions are independently distinct from each other for the reasons given above and because they have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter and the search for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

11. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

12. The applicant is also advised that the response must be submitted to the Office *within ONE [1] Month* or 30 days, whichever is longest.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert B. Harrell whose telephone number is (571) 272-3895. The examiner can normally be reached Monday thru Friday from 5:30 am to 2:00 pm and on weekends from 6:00 am to 12 Noon Eastern Standard Time.

14. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew T. Caldwell, can be reached on (571) 272-3868. The fax phone number for all papers is (703) 872-9306.

15. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-9600.
